

Caitlin Frank

Computer & Network Engineering / Computer Science (Honours)

caitlinfrank95@gmail.com | 0479 059 174 | github.com/caitlinfrank95 | linkedin.com/in/caitlin-frank-208695357

Computer and Network Engineering / Computer Science (Honours) student with multidisciplinary technical experience spanning software engineering, networking, cybersecurity, electronics, and iOS development. Experienced working in collaborative engineering environments on projects involving system design, programming, simulation, and data-driven applications.

EXPERIENCE

Electronics Technical Assistant

Jaycar Electronics | November 2025 – Present

- Provided technical product advice and assisted customers with electronics components and equipment.
- Applied practical electronics knowledge in a retail technical environment.

Consumer Electronics Sales Assistant

JB Hi-Fi | July 2025 – Present

- Advised customers on consumer electronics products across a broad range of categories.
- Developed communication and customer service skills in a fast-paced retail environment.

PROJECTS

Peaché — iOS Health App

Apple Foundation Program 2026 | SwiftUI, Xcode, Figma

- Selected participant in the Apple Foundation Program at RMIT, designing and developing a real iOS app in a cross-disciplinary team of three.
- Solely responsible for all SwiftUI development, completing a working happy-path prototype in three days.
- Designed full UI/UX in Figma, conducted user research, and presented the live app to an Apple panel — awarded Certificate of Completion.

GestureCanvas

Personal Project 2025 | Python, OpenCV, MediaPipe, cvzone

- Built a real-time hand gesture drawing application using webcam input and computer vision.
- Used finger landmark detection to map finger count to drawing colour; open palm triggers eraser mode.

Wide Area Networks Lab

EEET2368 Network Fundamentals | Cisco Packet Tracer, RIP, IP Addressing

- Designed and configured a packet-switched WAN connecting four LANs through edge and core routers.
- Implemented dynamic RIP routing and tested link redundancy by simulating live router failures.

Lunar Rover Wheel Design

OENG1250 Engineering Design 2025 | SolidWorks, CAD, Technical Drawing

- Designed a 130mm aluminium rover wheel for the RMIT Moon to Mars initiative in a team of six engineers.
- Performed speed, gear ratio, material selection, and ground pressure calculations to meet NASA mission specs.
- Produced detailed SolidWorks CAD model, technical drawings, and sub-assembly with the drive system.

BJT Transistor Biasing & Amplifier

Electronics Lab 2025 | Multisim, Oscilloscope, Circuit Analysis

- Designed, simulated, and physically measured a BJT voltage divider bias circuit and small-signal amplifier.
- Compared hand calculations, Multisim simulation, and lab measurements; mid-band gain 22.8 V/V.

Digital ID Platform

Java, UML, JUnit, GitHub Actions

- Designed system architecture and UML models (use case, class, activity, sequence) for a Digital ID platform.
- Implemented Java identity management features and JUnit tests; configured GitHub Actions CI pipeline.

Cybersecurity System Hardening

Linux Security, Network Security

- Analysed system vulnerabilities and implemented security controls and hardening techniques.
- Configured secure authentication, access control, and risk mitigation strategies.

Domestic Waste & Recycling Web Application

Web Development

- Developed a data-driven web application analysing waste and recycling trends across NSW.
- Implemented regional waste statistics explorer; conducted usability testing and iterative improvements.

EDUCATION

Bachelor of Computer and Network Engineering / Computer Science (Honours)

RMIT University | 2024 – 2028

Certificate III in Information Technology

Academy of Interactive Entertainment (AIE) | 2023 – 2024

CERTIFICATIONS

Apple Foundation Program — Certificate of Completion | 2026

SKILLS

Programming	Python, Java, Swift, C/C++, SQL, Visual Basic
Web	HTML, CSS, JavaScript
Engineering Tools	MATLAB, Simulink, NI Multisim, SolidWorks, Cisco Packet Tracer
iOS Development	SwiftUI, Xcode
Design	Figma, UI/UX Design
Other	Git, GitHub Actions, Linux, JUnit, OpenCV, MediaPipe
